WOOD/PATEL Growing in Tucson
Moving Offices to Accommodate Business Growth

(Phoenix, Ariz.) April 12, 2007 – WOOD/PATEL, the Valley's #1 civil engineering firm (*Ranking Arizona - The Best of Arizona Business, 2004-2007*), has relocated its Tucson office to accommodate its growing southern Arizona operation.

The new 5,000 square foot facility will accommodate WOOD/PATEL's 25 employees who offer civil engineering, water resources, water and wastewater design services, as well as construction management for both private and public clients.

"WOOD/PATEL projects in Tucson include the Sinclair mixed use project, OMNI Tucson National Resort and Spa Expansion, Mission San Augustin/Convento & Tucson Origins Heritage Park Downtown development projects, the CDO River Park, master planned communities, and several residential subdivisions. With the rapid growth in Tucson, and southern Arizona, this expansion allows us to further build relationships and continue offering quality services in the region," stated Patrick W. Marum P.E, an associate in the firm.

WOOD/PATEL's new facility, located at 3499 North Campbell Avenue, will be headed by Vice President, Patrick W. Marum, P.E. The company's office in Phoenix houses over 150 employees with an additional office in Mesa. WOOD/PATEL first opened its Tucson location in December of 2005.

About Wood/Patel

WOOD/PATEL, Arizona's #1 civil engineering firm, as ranked by Arizona Business Magazine (*Ranking Arizona - The Best of Arizona Business, 2004-2007*), has been serving Arizona communities for over 20 years. WOOD/PATEL is a full-service civil and structural engineering, surveying, transportation, and construction management firm providing services to public and private sector clients. The firm offers water/wastewater, transportation, water resources, master planned communities, surveying, bridge/structural and construction management services. Currently, WOOD/PATEL employs more than 200 engineers, surveyors, construction managers and technical and administrative support staff.
